

VETERANS FOR CLEAN WATER IS A PROUD PROGRAM OF SAVANNAH RIVERKEEPER

From Memorial Day through Labor Day our Veteran led team of citizen scientist collects weekly samples from 20 sponsored testing sites along waterways across the middle and lower Savannah River basin.

Using the water quality testing labs, located at Savannah Riverkeeper and Ogeechee Riverkeeper, samples are tested for levels of E-Coli, Dissolved Oxygen, Ph, as wells as turbidity and temperature.

Water quality results are quickly posted for the public, along with results from thousands of testing sites from across the country via the SwimGuide app and knowyourriver.com free to the public.

TESTING SITE SPONSORS FUND THIS VETERANS LED WATER QUALITY TESTING PROGRAM. EACH SITE SPONSOR WILL HAVE ITS COMPANY LOGO DISPLAYED ON AN INFORMATIONAL SIGN AT ONE TESTING LOCATION AS WELL AS PROMOTIONAL MATERIAL DURING THE SAMPLING SEASON AND RECOGNIZED AS A BUSINESS THAT SUPPORTS CLEAN WATER
